# The best comes last:

## Top results in the car wash business

The new Caramba X-Line FinishForce brings out the major quality and sales opportunities that often remain unused when it comes to the finish. After intensive analysis and research, Caramba has developed the absolute high-performance specialists for the essential finish applications 'Polish', 'Drying' and 'Conditioning' – **proven to be the best in their class!**

The innovative Power Team gives your system  
– and your business – a stunning boost.

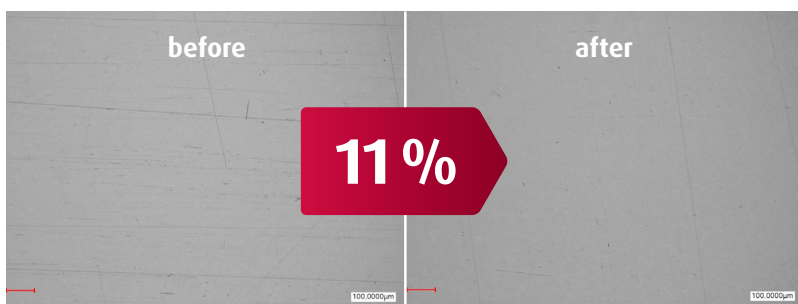

- PolishForce**  
The super polish you can actually feel, with unique polymer technology
- DryForce**  
The uncompromising high-performance dryer that accelerates things
- WaxForce**  
The top conditioner that preserves value thanks to its long-lasting protection

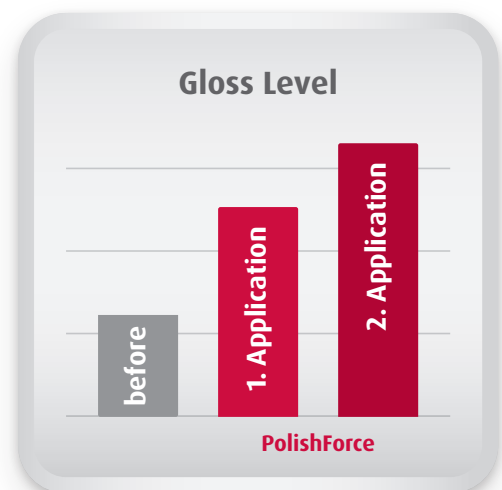

## PolishForce

### Spectacular smoothness, shine and gloss

PolishForce revolutionises the polish by its special polymer technology. Paint unevenness is concealed and the paint surface is noticeably and measurably smoothed by 11% after just one application. The paint coat reflects mirror-like instead of diffuse and thus inspires with amazing gloss and intensified colours.

The powerful success formula of **PolishForce**: more smoothness,  
more gloss

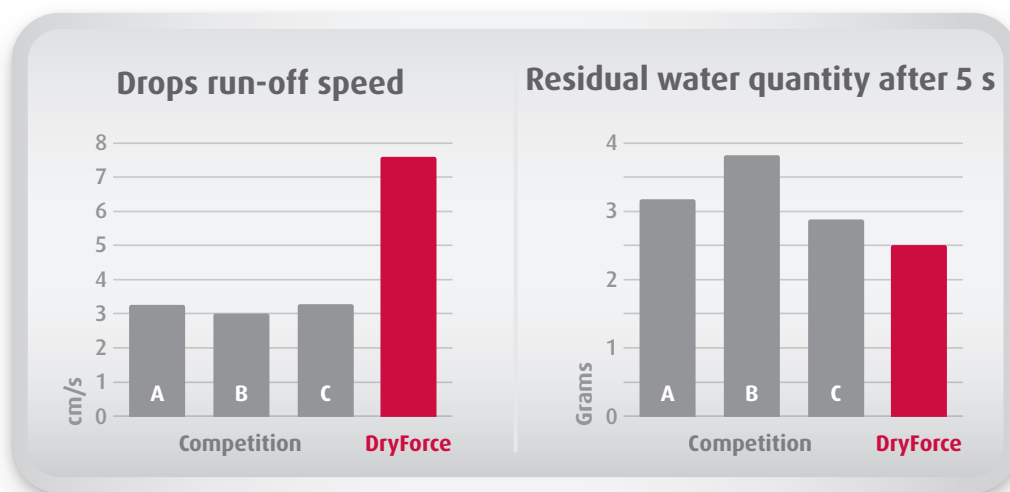

### FinishForce effect

PolishForce creates a fascinating gloss and colour effect that can be seen and touched. Real quality that draws customers to the car wash!

## DryForce

### Rapid run-off of drops, fast washing process

DryForce revolutionises the drying process. It ensures that the water film is broken up over a large area, that drops run off extremely quickly and that the paint surface is virtually free of microbeads. Plain sailing for the fan! Even with extreme water hardness, very short break-up zones and difficult fan configurations.

### > FinishForce effect

DryForce facilitates high line speeds and therefore more washes.

**DryForce: Winner of the competition in speed and performance**

## WaxForce

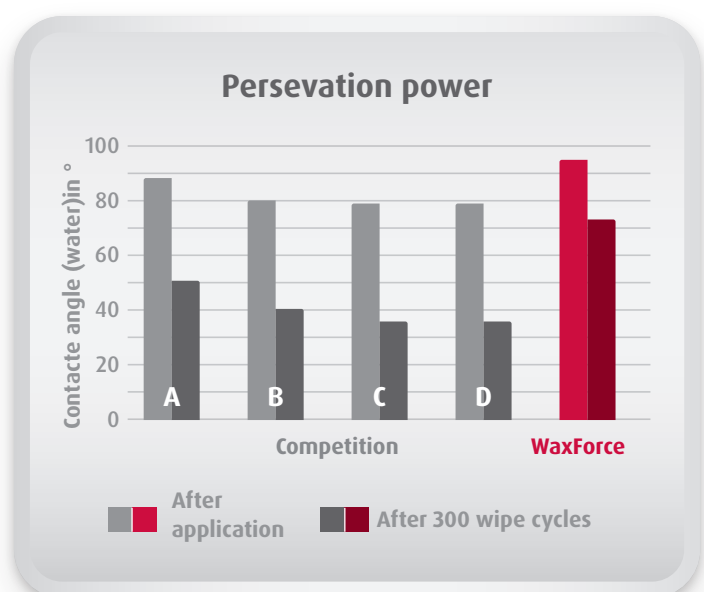

### Long-term preservation for extended value retention

WaxForce revolutionises preservation with extreme hydrophobicity compared to competitive products, even after 300 wipe cycles in the test!

It creates a long-lasting layer on the surface that repels water and dirt. WaxForce thus protects the paintwork longer and better against the damaging effects of insect remains, dirt, road salt or UV radiation, among other things – and ensures value retention in the long term!

### > FinishForce effect

WaxForce preserves longer and better than comparable products – and convinces end customers by long-lasting beading and easy-to-clean effect.

The extreme hydrophobicity contributes essentially to the superior performance of WaxForce.
